

ACLAB12

The 12th Asian Conference on Lactic Acid Bacteria

**Evidence-based LAB:
Advances,
Opportunities and
Challenges**

2nd Announcement

DATE : 10th – 13th OCTOBER 2022

VENUE : BCCK, KUCHING, MALAYSIA

The Malaysian Society for Lactic Acid Bacteria (MSLAB) is proud to host the 12th Asian Conference on Lactic Acid Bacteria (ACLAB12) under the auspices of the Asian Federation of Societies for Lactic Acid Bacteria (LAB). The main objective of ACLAB12 is to disseminate cutting edge developments of LAB. The conference theme of ACLAB12: “Evidence-based LAB: advances, opportunities and challenges” will encompass 8 tracks of scientific sessions. The 12th ACLAB will continue to be the primary platform to showcase the fast development of LAB-based research and technologies that will facilitate networking and collaborations with various stakeholders. We look forward to meet researchers, academicians, students and industry representatives to participate in this highly anticipated event.

Industrial and regulatory approval of probiotics

Scope: Clinical trials, Design and guidelines, Quality control of manufacturing, Regulatory approval of probiotics

Next-generation and innovation of LAB

Scope: New preparation and innovation of LAB

Metabolism of LAB

Scope: Biochemistry and Fermentation process of LAB

Molecular genetics of LAB

Scope: Genetics and genomics analysis of LAB

Conference Themes

Food and agriculture-based LAB

Scope: Role of probiotics in food and agriculture productivity

LAB and host interactions

Scope: LAB interaction in gut and beyond

Taxonomy of LAB

Scope: Identification and classification of LAB
